

CSR and SPONSORSHIP activities

For many years Mentor S.A. has been supporting activities related to the promotion of sport, culture and art, as well as various charity organisations.

We are passionate about art, therefore we try to have a real impact on its development and popularity. We help organise vernissages of young, talented artists, graduates of the Faculty of Fine Arts at Nicolaus Copernicus University in Toruń, as well as artistic open-air workshops developing talent and passion in painting among the participants.

For its involvement in promoting sports events, every year since 2013 Mentor S.A. has been awarded the title of Patron of Sports in Toruń.

We help others by donating money to both orphanages and hospices. Together with the Dorastaj z Nami (Grow-Up with Us) Foundation, we help build the future of children whose parents have died or been injured in active public service. We support the activities carried out by the Foundation of the Polish Knights of Malta within the framework of humanitarian aid, medical and social activities.

we support professional start

For several years, we have been helping students to start their careers, mainly through summer internship programmes and a competition for the best master's thesis.

In cooperation with the Nicolaus Copernicus University, we support the activities of the Faculty of Economics and Management, providing students with development and practical knowledge of the insurance market.
